Does Your Business Offer an Online Traffic School and/or Driver Education Program to Your Customers?

If your answer is no, let CyberActive pave the way for your business to provide top-notch online traffic school and driver education courses to your customers, while reaping substantial financial rewards.

If your answer is yes, schedule an appointment with us to explore your existing partnership. We guarantee to surpass any rate they offer!

About Our Company

In the year 2000, CyberActive made history as the first business offering online Driver Ed and Traffic School courses in California, forever changing the landscape of taking a course in person for traffic school and driver education. Over the next 24 years, CyberActive expanded its offerings by getting course approvals for online traffic school and driver education in over 26 states. Surpassing all competitors, CyberActive proudly boasts the highest number of course approvals.

Our White Label Partner Program Solution

With CyberActive's innovative white label partner program, we handle all the complexities, from software updates and management to legal updates and state renewals. That way, your business can effortlessly offer top-quality online traffic school and driver education courses through your own driving school's website. We'll have your school set up in no time, delivering online courses that bear your branding and style, right down to the last detail.

And here's the cherry on top: you can seamlessly integrate your behind-the-wheel offerings into our registration portal. No more generic solutions – CyberActive's unparalleled white label solution puts you in the driver's seat of your business's success. Join us in revolutionizing the online driver education industry with a solution that's not just groundbreaking, but also fosters brand loyalty and repeat business, ensuring your driving school stands out from the crowd.

About Our Courses

We provide both traffic school and driver education courses under different websites.

This website offers online traffic school and defensive driving courses that are approved in 18 states.

This website offers online driver education courses that are approved in 14 states for teens wishing to get a driver license.

Our online programs include interactive chapters enhanced with driving simulations, a read-along feature and captivating games, transforming the learning experience into an enjoyable and highly effective journey for students.

Elevate your business by offering either one or both engaging courses on your website, empowering your audience with valuable knowledge while adding to your services offered.

Incorporating CyberActive into Your Business:

Integrating our courses into your school's curriculum is straightforward and cost-effective. Here are your options:

WHITE LABEL BRANDED REGISTRATION PORTAL:

We can create a customized portal linked to your website for easy student enrollment. This portal will look like it is a part of your website and will contain your brand's look and feel.

Your staff can access a secure admin dashboard to track detailed student information including course progress, payments, and a student footprint.

Furthermore, we can enhance your branded registration page by incorporating your driving lessons. This means that when students register online for driver education, they'll also have the convenient option of ordering your driving lessons online right after they register for the online course.

Our company does not offer behind-the-wheel driving courses because we do not believe in competing with our partners. In fact, when we get inquiries for behind the wheel lessons from our own customers, we will forward them to our partners. This is more business for you if you become our partner!

EASY LINK INTEGRATION:

We can provide you a direct link on your driving school's website for student access to our course—simple and convenient. When your students use that link, they will be directed to our website and you will get commission for each referral.

COUPON CODES:

Purchase coupon codes at a discounted bulk rate to distribute to your students, making it even more accessible.

Ready To Get Started?

Make CyberActive your trusted partner in enhancing your business offerings and providing students with a comprehensive and engaging educational experience!

At CyberActive, we prioritize our partners, which is why we're proud to offer the highest commissions. If you're currently receiving a higher commission elsewhere, we guarantee to beat it! Your success is our priority, and we're committed to maximizing your earnings

"Ourian has created a "white label" industry, which allows companies to offer her programs under their own brand. In effect, once a student of a CyberActive partner institution visits the institution's website, they can click on a link that will direct them to a course that is in complete alignment with the operation's brand. Students then take the entire course on what appears to be the partner institution's site, so the student will never even know that a transition has occurred."

"We are known for inventing the online traffic school and driver education concept for adults and teens and for our contribution and lobbying efforts in this VoyageLA space. Many of the protocols and laws that govern online traffic school and driver education courses-measures to deter cheating, course timers, course activity monitors and various mechanisms to ensure course security were developed and implemented by my company. Now they are the approval guidelines."

"... Over the years we have consistently been chosen by government agencies, such as the Indiana BMW, the Baton Rouge city government, Iron County Municipality"
